Art at the service of care

At the crossroads of art and science, I imagine illustrations inspired by human anatomy and the medical world.

Author-artist and radiology technologist, I am committed to transforming care spaces into warmer, more soothing, and more human environments, for the well-being of patients, caregivers, and visitors. Welcome to my universe.

Introduction

Radiology technologist, mother and author-artist
in the North of France, it is in 2023 that I decided
to dedicate my art to brightening up our healthcare spaces
which really need it in this difficult context

WHAT I WANT TO OFFER

- 🌈 Stories to tell children thanks to a magical illustration to ease their impatience.
- ☕ A well-deserved coffee in front of a colorful wall that gives you energy.
- 📖 An original decoration adapted to care settings.
- 🌿 A calming environment for your patients that reflects your specialty.
- 😊 Smiles on the faces of nursing home residents evolving through flowers and butterflies...

OBJECTIVES

1
